Robot Consulting Co., Ltd. (Hereinafter "Robot Consulting". Head office: Chuo-ku, Tokyo, CEO: Akihito Usui), a software developer using AI technology, and Life is Style Inc. (Hereinafter "Life is Style". Head office: Shibuya-ku, Tokyo, CEO: Makoto Onuki), a 3D holographic display company, will jointly develop a service for streamlining legal services and personal consultations using AI technology and 3D avatars from Friday October 1, 2021.

■Outline of the service to be developed

The service will enable users to easily consult with an AI lawyer avatar projected on a 3D holographic display "3D Phantom®" in an interactive format.

The service is scheduled to be introduced in public facilities in December 2021.

■Background of joint development

Robot Consulting has been providing a web-based business efficiency system for law firms and a legal consultation service for individuals, and has received positive feedback from users, such as, "Since it is AI, I don't have the psychological burden of confiding my problems to others." On the other hand, users who are not familiar with using PC said, "It would be easier to use if there was an opportunity for easy consultation in a real-world setting."

Therefore, we decided to jointly develop this service using our 3D holographic display "3D Phantom" in order to "create a society where people can feel more familiar with the judiciary and live with peace of mind" through this service that reduces psychological burden by using AI and provides a sense of security through the use of avatars. We have decided to jointly develop this service using our 3D holographic display "3D Phantom".

■About 3D Phantom

3D Phantom is a 3D hologram display provided by Life is Style that allows users to experience high-impact 3D images with the naked eye by rotating a blade with a line of LED light sources at high speed and projecting images through the afterimage of the light (no special glasses, etc. are required).

■Outline of AI Labor & Lawyer Robot Service

<Comprehensive labor management system using AI technology>

- In addition to existing labor management, the system provides necessary services such as equal pay for equal work and management of subsidy applications in line with global trends.

<Services for streamlining attorney work and personal consultations using AI technology>

- The service provides the search and presentation of "legal precedent data" and "internal past data" as tasks that are mainly performed manually in the attorney's office and occur on a daily basis. This service has a significant impact on reducing labor costs and improving work efficiency.

- The service provides support for solving problems that may occur to individuals, such as simple consultation cases and online slander cases, which are too difficult to consult privately, using AI technology.

■Life is Style Company Profile

With the vision of "becoming an infrastructure that provides fresh experiences for all people," we are an experience design company that provides new experience value with 3D hologram images with a futuristic feel. Through the provision of its own service, "3D Phantom," the company will promote the creation of new encounters between companies and consumers at commercial facilities, events, outdoor advertising, etc.

Company Name : Life is Style Inc.

Location : 1F kurkku home, 2-18-21 Jingumae, Shibuya-ku, Tokyo
