Robot Consulting Co., Ltd. (Head office: Tokyo. CEO: Akihito Usui. Hereinafter "Robot Consulting"), a company that provides professional services in the metaverse, has been patented for the use of blockchain technology in the metaverse space.

■Outline

At the request of an expert such as a lawyer or at the request of a client who has requested a deliverable from an expert, information to identify the electronic data storage location of the deliverable and the expert's information will be recorded on the blockchain. Then, at the

request of the third-party user, it outputs the electronic data of the deliverable or information about the expert who created the electronic data of the deliverable.

This allows users to view and understand the electronic data of the deliverables (e.g., written opinions) of lawyers and experts, reducing the burden of obtaining reliable information to address the subject matter, which effectively facilitates the search for experts who can actually address the issue.

In the future, we will use our patented technology to work with law offices to collect precedent records in the metaverse and resolve legal issues in the metaverse.
