Robot Consulting Co., Ltd. (Head office: Minato-ku, Tokyo. CEO: Hidetoshi Yokoyama. Hereinafter "Robot Consulting"), a company that provides professional services in the metaverse, has formed a business alliance with The CJK Group (Head office: Arizona. CEO: Jonathan Rossi.), a US-based legal outsourcing firm specializing in the legal services of clients in the US and Japan. In conjunction with this, we have begun development of a US version of our "Robot Lawyer" service. We will expand our business to the US to improve the operational efficiency of the US law firms (including major and global firms to subcontractors).

■About The CJK Group

The CJK Group is a leading US and Japan-based legal outsourcing firm dedicated to supporting lawyers at the world's largest global law firms to work more efficiently and accurately. The CJK Group also runs legal conferences to discuss important topics in the areas of legal tech and legal outsourcing, which are held four times a year for two days at luxury resorts in Japan and the US.

The CJK Group's clients are the most prestigious law firms and global consulting firms and have established good relationships. We have been able to secure major contracts to support thousands of lawyers around the world by specializing in legal outsourcing, which requires the management of complex data sets in multiple languages. We have the most extensive network of lawyers in the legal ecosystem.

■Development of the US version of "Robot Lawyer" with The CJK Group

In order to expand outsourcing services in legal affairs, we will develop and begin implementation of the "CJK AI Lawyer", a legal affairs automation tool. This "CJK AI Lawyer" automates and speeds up lawyers' responses in lawsuits. With more than 40 million lawsuits filed each year in the US, some of the proceedings can be very repetitive, expensive, and time consuming. Our AI Lawyer automates part of this process called "Discovery", to help respond to legal discovery requests. We focus on other areas of law that are both routine and administratively burdensome, allowing us to speed up the workload, thereby reducing lawyers' work time and high costs.

We estimate that a task that normally takes 10 hours can be completed in a few minutes, followed by 1 to 4 hours of fact-checking by a human reviewer, depending on the complexity of the task. The global legal industry spends more than \$900 billion on legal services, and firms are seeking solutions to reduce their costs. The US accounts for half of the \$900 billion legal services spending. We believe our tool will free up people's time and at the same time be an option for targeting the huge market opportunity using AI.

Using OpenAI's ChatGPT and Google's Bard as a starting point, we will utilize our proprietary "CJK AI Lawyer". Legal support requires accuracy, precision, and data security. Current AI systems such as ChatGPT alone are not sufficient for many legal support tasks. The CJK Group as a company has been providing specialized review lawyers to global law firms for many years. With the introduction of this AI Lawyer, we will extend our current AI system with a seed set of training data specific to this industry, building a knowledge library that will become a part of the daily routine in the practice of lawyers. The training data is a model for our "Robot Lawyers" to continuously learn from the examples of the correct responses by a particular lawyer's work. These models will be used as the framework for AI Lawyer, and serve as the foundation for constant learning. As a result, the most powerful proprietary engine will be built, and will be very useful. Attorneys, paralegals, administrative workers, and legal assistants will benefit greatly from this powerful productivity tool that combines the best of today's AI engines.

■Robot Consulting Company Profile

Company Name: Robot Consulting Co., Ltd.

Location: 2-6F Le Gratteciel Bldg., 5-22-6 Shimbashi, Minato-ku, Tokyo
