

PRESS RELEASE

Robot Consulting

To all members of the press

Robot Consulting Co., Ltd. will promote the Metaverse businesses and Web3 projects with the development of “Metaverse HP” and “Meta Mall”.

Robot Consulting Co., Ltd. (Head office: Minato-ku, Tokyo. President: Hidetoshi Yokoyama.

Hereinafter "Robot Consulting"), a company that provides professional services in the metaverse, will focus on the development of the metaverse and promote corporate metaverse businesses and Web3 projects with the development of "Metaverse HP" and "Meta Mall".

■ What is Metaverse HP?

The Metaverse HP allows you to explore the metaverse (virtual) space and get in touch with our information and services. There are four main rooms: "Labor Robot", "Lawyer Robot", "Company Yearbook", and "NFT Products". By moving your avatar through these rooms, you can learn information about our company while experiencing a metaverse (virtual) space, rather than simply viewing our website.

(Space of our reception)

(Space of our service introduction)

(Space of our company yearbook)

In conventional homepages, visitors scroll up and down or click on items on a flat page composed of text and still images to view the information. The Metaverse HP now allows visitors to view our information by "moving around in space" using an avatar instead of scrolling. Through these services, we will contribute to the entry of companies into the metaverse business and the further development of the metaverse industry.

To experience our Metaverse HP, please check the following URL.

■What is Meta Mall?

Meta Mall is a shopping mall on metaverse jointly developed with Metaropolice, Inc. Users can enjoy 3D products from various angles as if they were walking through a real shopping mall, providing a realistic purchasing experience.

Products of interest can be purchased by transferring from Meta Mall to the e-commerce site. In the future, we plan to update to allow users to purchase products and change avatars' clothes and so on in the Meta Mall.

Now that the metaverse is attracting attention, companies from a wide range of industries are announcing their entry into the metaverse business. However, since metaverse is a new business area, the barriers to entry are still high, and many companies are unsure of "how to enter the metaverse business", or are unsure of "what a metaverse is in the first place". We will continue to offer various services and initiatives including "Metaverse HP" and "Meta Mall" to help such companies take the first step into the metaverse business, and also to contribute to the development of the entire metaverse industry.
